Card Payment / Contactless

ELITT extends its offer of contactless tests

Caen, France, October 29th, 2013. **ELITT specialist in secure electronic transactions and recognized for the quality of its functional tests, extends its services towards contactless technologies, by offering particularly compliance evaluations with ISO 14443 standard.**

Already well used in the field of transportation and identity, contactless technologies have reached a high maturity level in the activities of payment and healthcare, as well as many other consumer markets, enabling new features.

With its new offer contactless conformity evaluation, ELITT may now assist stakeholders of the secure electronic transactions market when deploying new project integrating technology based on ISO or NFC standards such as cards, mobile tablets...

Meanwhile, ELITT is actively involved in standardization projects for contactless technologies, collaborating in the development of RF standard of AFIMB and integrating the work of the NFC Forum.

ELITT should shortly enrich its contactless test offers with other accreditations.
